ABOUT US

PASSION FOR EXHILARATING, FUN & INNOVATIVE WATER SPORTS ECO-FRIENDLY ELECTRIC WATER TOYS

Sky above, sand below and passion for the sea. K&T Sun & Fun provides exhilarating water sports equipment, bringing eternal joy to your sea interactions with your family and friends, while preserving the environment. With a new generation of water toys, 100% eco-friendly, the ocean is waiting for your next adventure and ride.

As a trusted distributor of international brands, we are committed to offering the latest environmental friendly technology for adventurous water sports enthusiasts to experience the waters of the world with zero emission.

Everything changes when you touch the water.

BLUEWAY

SCOOTER OF THE SEA WITH EXCELLENT MANEUVERABILITY AND STABILITY

BlueWay is a marine electric propulsion scooter, similar to an electric SUP (stand up paddle), but more solid with a wider plate and handlebar. Thanks to its reversible directional propulsion, a world's first, BlueWay has excellent maneuverability. Designed by Next Blue Tech in France, BlueWay is extremely robust, safe, environmentally friendly and easy to use, making it suitable for everyone between the ages of 5 – 85 years. The autonomy of 7 hours is a first in the electric water sports world and with a capacity of carrying up to three people (max. 150 kg) BlueWay provides pure family entertainment on the water!

BlueWay's intelligent technology enables self-diagnosis via App, while its interchangeable elements "Plug & Go" minimize maintenance. BlueWay is a product of great robustness and reliability, specifically designed for tourism professionals.

Foldable handlebar
Easy to tow and store on land

Carrying up to 3 people (max. 150 kg)
Silent, 100% electric, 0% emission

100% electric, 0% emission,
Board is made out of 100% recyclable HDPE

Moderate speed of 7km/h forward & reverse,
Easy maintenance 'Plug & Go'

Stable & solid, Accessible to all
Family Activity from 5-85 years old

BATTERY

- Lithium-Ion
- Power 2 kWh
- Autonomy of 7 hours
- Recharged in 3.5 hours
- Weight 12kg

SPECIFICATIONS

- Engine 400 W
- Dimensions 250 x 105 x 40cm
- Weight 50kg (excl. battery)
- Handlebar 85cm
- Board is made out of 100% recyclable HDPE

ONEAN

100% ELECTRIC JETBOARDS ONE MODEL FOR EACH PURPOSE

Onean all electric surfboards by Aquila were born to enjoy cruising, carving and high speeds of up to 45 km/h over water, without the need of waves. Depending on your riding style, Onean developed various types of jetboards to fit every type of riders needs and to experience the pleasure of gliding above the water with zero emission. These perfectly engineered and shaped electric jetboards with little and easy maintenance are the perfect fit to experience the thrill of planing across the surface of the sea.

Powered by a lithium-ion battery, the jet activates by simply pushing the trigger of the wireless remote control. Depending on your riding style, speeds are configurable and you can race across the water, carve or enjoy a relaxing excursion.

CARVER TWIN

THE MOST VERSATILE MODEL

The new Carver Twin is built with a double jet system, which increases +30% the performance compared to its previous version.

The twin jet does not shorten the riding time of the board. The Carver Twin still offers 40 minutes of riding time at mixed speeds.

The Carver Twin allows planing to riders up to 90 kg, and only needs a single battery and one jet to reach 35 km/h (20 mph) with a 75 kg (165 lbs) rider.

CARVER TWIN SPECIFICATIONS

- Length 240 cm
- Width 70 cm
- Weight (excl. battery) 20 kg
- Volume 150 l
- Power 5 kW

CARVER X

MORE POWER, MORE SPEED

The Carver X is designed for riders over 85 kg (17 lbs). It can bring a 100 kg (220 lbs) rider to over 40 km/h (25 mph) and can reach a speed of 45 km/h with a 85 kg rider (187 lbs).

The Carver X has a dual jet propulsion system which offers 10 kW of power.

It includes two batteries. These batteries are the same, therefore they can be used for any other Onea product and have a running time of around 40 minutes at mixed speeds-

CARVER X SPECIFICATIONS

- Length 240 cm
- Width 70 cm
- Weight (excl. battery) 25 kg
- Volume 150 l
- Power 10 kW

MANTA

ALL-AROUNDER FAMILY BOARD

Manta is an all-around family board designed for long relaxing excursions. Its large surface gives you plenty of balance. Just turn on the engine and enjoy the ride.

The wireless controller has two different power levels: travel up to 10 km/h (6 mph) with 100% power for up to 2.5 hours or set the power level to 50% and enjoy cruising for up to 6 hours.

There is enough space to carry your fishing and snorkeling equipment, picnic basket, cooler, etc. The possibilities are endless.

MANTA SPECIFICATIONS

- Length 230 cm
- Width 90 cm
- Weight (excl. battery) 17 kg
- Volume 200 l
- Power 750 W

PLUG & PLAY SYSTEM

No knowledge needed. Replaceable components and universal battery systems.

All jetboards utilize the same battery – simply remove and replace the battery with another one.

With new built-in diagnosis systems and interchangeable jetpacks, replacing components is easy and maintenance is hassle free.

- Max. electric discharge: **130 A**
- Nominal voltage: **44,4 V**
- Capacity (rated): **1.500 Watts hour**
- Weight: **14 kg**

PROTECTIONS:

- Short circuit
- Over charge
- Temperature
- Waterproof
